PROFILE

I am a passionate Android developer driven by a commitment to technical excellence. My keen attention to detail ensures that the applications I create stand out for their quality and execution. I thrive in a collaborative environment, contributing to team success through effective teamwork and leadership — including successfully building and mentoring IT teams from scratch.

EXPERIENCES

Trident Media | March 2023 – May 2026

- Developed full-featured Android applications from scratch, as well as core Android SDK components and reusable libraries, focusing on performance, security, usability and seamless integration into partner mobile applications.
- Ensured excellent multi-device compatibility by testing and optimizing applications across a wide range of Android devices — from low-end budget phones to high-end flagships (different screen sizes, densities, API levels 26+).
- Designed and implemented scalable, clean architecture (MVVM, MVI) with strong emphasis on maintainable and well-tested code.
- Built reliable data exchange layers using REST API (Retrofit2 + OkHttp), background processing (Coroutines, WorkManager) and modern local storage solutions.
- Actively participated in code reviews, performance profiling, debugging and resolution of device-specific issues and bottlenecks.
- Collaborated with cross-functional teams (backend, product, QA) in Agile environment (Jira, Trello).

Traffic Jet | May 2026 – July 2026

- Developed Android applications from scratch, primarily WebView-based products, focusing on performance, usability and reliable integration with web services and backend systems.
- Integrated and configured mobile attribution, analytics and tracking solutions, including AppsFlyer, OneSignal and Keitaro.
- Collaborated with designers and backend developers to deliver and maintain production-ready Android applications.
- Worked as a Android developer, taking ownership of technical decisions, troubleshooting complex integration issues and supporting the full Android development lifecycle.

HARD SKILLS

- GIT, Postman, Trello\Jira, Figma
- Keitaro
- Claude, Grok, Gemini, Copilot
- Google Play.
- Java, Kotlin.
- OOP, MVVM, MVC, MVI, MVP.
- Android SDK, Gradle, Groovy.
- XML, Compose
- Multithreading, Coroutines, RxJava
- StateFlow&SharedFlow, LiveData.
- REST API, Retrofit2, Okhttp 3, ktor.
- SQLite, SharedPref, Jetpack DataStore, MMKV, Hawk, Room, Realm Firebase.
- Jetpack Compose (UI), Design System, Modular Architecture
- Koin, Hilt, Dagger2
- WebView,
- Appsflyer, OneSignal.

SOFT SKILLS

Proactivity, leadership in building and mentoring IT teams from scratch, analytical mind, critical thinking, responsibility, ability to learn quickly, ability to teach and mentor others, independence, problem solving, sense of humor, adaptability, excellent communication, organizational skills, teamwork, ability to delegate.

LANGUAGES

- ENGLISH – B2
